 President/CEO:

Business Identifier:

Instrumentation development for chemical, optical and space sciences; Expertise in aeromechanics, electrochemistry, optical, material science, combustion, environmental, laser and medical technologies

General Profile:

Extensively involved in SBIR-STTR from the very earliest days of the program's creation and having been established even before the program was launched, Physical Sciences is among the relatively small handful of Awardees having undertaken hundreds of projects across all the participating federal entities and in receipt of one of the largest dollar accumulation of program dollars and follow-on contract funding, Physical Sciences Inc. operates as a research and development company providing contract research and development services to government and commercial customers in a wide variety of areas. The firm has on-staff expertise across a wide range of fields and disciplines offering advanced technologies and project development activity in a range of areas from aerospace, chemical, defense, energy, environmental, manufacturing and medical applications.
