General Profile:

Spun out of University of Michigan and now having facilities and personnel in Ann Arbor, MI, Orlando FL, Dayton, OH and Saline MI, SoarTech is an artificial intelligence company focused on development of smart and intuitive human/robot interface devices. By improving situational understanding through the firm's Operator Control Unit (OCU) and leveraging automation through their Smart Interaction Device (SID), SoarTech is working to create beneficial human-robot interactions that include the robot as a true part of the team. This technology has both civilian and military applications. The firm's products are designed to simplify human-system interaction and simulate human-like behavior, with applications in modeling and simulation, intelligence analysis, games, command and control, robotics command and control, medical informatics, military training, and information management. The company also offers solutions for various diverse domains related to national security, including military training, cybersecurity, command and control, information management, and intelligence analysis.
